### READING COMPREHENSION:

## Fossils

Fossils are shapes of dead animals and plants that lived millions of years ago made in rock. Usually when something dies it is eaten or decays and disappears. However, when an animal or plant dies it can get covered over and, over millions of years, become a fossil.

### Dinosaurs

- Fossils are really important to know what happened a long time ago.
- Without fossils we would not even know that dinosaurs existed!
- People who study fossils are called palaeontologists.
- Palaeontologists started studying fossils 200 years ago, so we've only known about dinosaurs for 200 years!

1. How long have we known about dinosaurs? Tick **one**.

- 200 million years
- 200 thousand years
- 200 years
- 200 days

2. What is the name of a person who studies fossils?
